SUMMARY

Computer Engineering and Software Engineering double major student at Haliç University, actively developing expertise in Full Stack Development and Artificial Intelligence. Hands-on experience in building scalable backend systems with Go and Python (FastAPI, Django) and interactive frontends with Vue.js. Proven ability to deliver integrated projects from backend and database design to frontend implementation. Completed a software development internship focused on RESTful APIs, Docker, and Agile methodologies. Eager to apply a blend of academic knowledge and practical skills to contribute innovatively as a summer intern in backend or full-stack projects.

EXPERIENCE

Ensmart Technology

June 2025 – August 2025

Software Development Intern

Istanbul, Turkey

- Developed and optimized RESTful API endpoints using Python (Flask/Django) and Go, improving data processing response times.
- Built high-performance backend services in Go suitable for a microservice architecture.
- Containerized applications using Docker and participated in deployment workflows.
- Performed complex data operations and reporting by writing advanced SQL queries for MySQL databases.
- Utilized Postman for comprehensive API testing and documentation in an Agile/Scrum team.

TECHNICAL SKILLS

Programming Languages: Go, Python, Java, C++

Backend Technologies: FastAPI, Django/Flask, Gin (Go), RESTful API, Microservices

Frontend Technologies: Vue.js, JavaScript, HTML5, CSS3, Vuetify

Databases & Tools: MySQL, SQLite, Git, Docker, Postman, VS Code, IntelliJ IDEA

ML/AI & Concepts: Scikit-learn, XGBoost, Data Preprocessing, Agile/Scrum, OOP

EDUCATION

Halic University

2023 – 2027 (Expected)

Bachelor of Science in Computer Engineering - GPA: 3.00

Istanbul, Turkey

Halic University

2024 – 2027 (Expected)

Double Major in Software Engineering - GPA: 3.05

Istanbul, Turkey

PROJECTS

Industrial IoT (IIoT) Attack Detection System | Python, XGBoost, FastAPI, Vue.js, SQLite

- Built an ML-based IIoT attack detection system with 99.85% recall.
- Developed 12 RESTful FastAPI endpoints and integrated SQLite storage.
- Designed a Vue.js dashboard for monitoring and alert analysis.

Go Product Management Microservice | Go, Vue.js, JWT, Docker, MySQL

- Developed a full-stack product management application using Go for the backend and Vue.js for the frontend.
- Implemented JWT-based authentication and structured a clean MySQL-backed backend architecture for maintainability.
- Dockerized the project to enable consistent development environments and smoother deployment workflows.

Shopora (In Progress) | Next.js, React, MySQL, JavaScript, Tailwind CSS

- Co-developing a full-stack e-commerce marketplace in a 2-person team, contributing across both frontend and backend development.
- Built and integrated core modules including authentication, product listings, favorites, messaging, checkout, and order workflows.
- Contributing to the design of a scalable marketplace architecture with both admin and user-facing functionalities.

LANGUAGES

Turkish: Native Proficiency

English: B2 (Upper Intermediate)
